TD-110 Verification Report - Customer must not see internal sub-statuses (e.g. Reviewed)

Environment: https://dev.techdomain.com.au · Date: 2026-10-09 · Tool: Playwright (API + browser) · Spec: tests/td-110-customer-substatus.spec.js · Evidence: evidence/TD-110-CustomerSubStatus/run-1009125921 · Work order 965

1. Overall result

- **Ticket requirement - "Reviewed" sub-status hidden from the customer (listing + detail): PASS**
- **"PO Pending" still visible to the customer (listing + detail + API): PASS**
- **Tech Domain side still shows "Reviewed": PASS**
- **All checks:** 39 pass / 0 fail (39)
- **Observed rule on dev:** the customer API returns `subStatus = null` for every technician sub-status (Not Confirmed, Confirmed, Ready to go, On the way, Running Late, Checked In, Checked Out) and only exposes `PO_PENDING`; the customer UI therefore never shows a technician sub-status badge. The dev comment on the ticket ("the tech and po pending substatus will be visible to the customer only") can be read as "technician sub-statuses should be visible" - **confirm with the developer whether hiding them is intended**.

2. Accounts and work order

Role	Email	Password
Customer owner (Customer Company 10090955)	customer-10090955@mailinator.com	B4!Z7z9pPkuz
Tech Domain owner (client)	istkhar+2@techdomain.com.au	Hussain@512
Engineer (assigned)	Ha@mailinator.com	Hacktime123@

Work order 965 of the customer was driven through every sub-status by the engineer (tasks, check-in/out, mark complete) and Tech Domain (confirm, reviewed, verify, PO pending, approve). At each step the Tech Domain API, the customer API (detail + listing), the customer listing page and the customer detail page were checked; at REVIEWED the Tech Domain detail page was checked as a control.

3. Results per sub-status

NOT_CONFIRMED · Tech Domain API ASSIGNED/NOT_CONFIRMED · customer API ASSIGNED/null (customerStatus -) · 3/3 passed

Customer listing row (tab ASSIGNED): -
Customer detail header:
Info: technician sub-status NOT_CONFIRMED - customer API exposes it: false, customer listing badge: false

- **PASS** Tech Domain API subStatus is NOT_CONFIRMED
- **PASS** status is ASSIGNED
- **PASS** customer listing shows the work order

CONFIRMED · Tech Domain API ASSIGNED/CONFIRMED · customer API ASSIGNED/null (customerStatus -) · 2/2 passed

Customer listing row (tab ASSIGNED): -
Customer detail header:
Info: technician sub-status CONFIRMED - customer API exposes it: false, customer listing badge: false

- **PASS** Tech Domain API subStatus is CONFIRMED
- **PASS** customer listing shows the work order

READY_TO_GO · Tech Domain API ASSIGNED/READY_TO_GO · customer API ASSIGNED/null (customerStatus -) · 2/2 passed

Customer listing row (tab ASSIGNED): -
Customer detail header:
Info: technician sub-status READY_TO_GO - customer API exposes it: false, customer listing badge: false

- **PASS** Tech Domain API subStatus is READY_TO_GO
- **PASS** customer listing shows the work order

ON_THE_WAY · Tech Domain API ASSIGNED/ON_THE_WAY · customer API ASSIGNED/null (customerStatus -) · 2/2 passed

Customer listing row (tab ASSIGNED): -
Customer detail header:
Info: technician sub-status ON_THE_WAY - customer API exposes it: false, customer listing badge: false

- **PASS** Tech Domain API subStatus is ON_THE_WAY
- **PASS** customer listing shows the work order

RUNNING_LATE · Tech Domain API ASSIGNED/RUNNING_LATE · customer API ASSIGNED/null (customerStatus -) · 2/2 passed

Customer listing row (tab ASSIGNED): -
Customer detail header:
Info: technician sub-status RUNNING_LATE - customer API exposes it: false, customer listing badge: false

- **PASS** Tech Domain API subStatus is RUNNING_LATE
- **PASS** customer listing shows the work order

CHECK_IN · Tech Domain API INPROGRESS/CHECK_IN · customer API INPROGRESS/null (customerStatus -) · 3/3 passed

Customer listing row (tab INPROGRESS): -
Customer detail header:
Info: technician sub-status CHECK_IN - customer API exposes it: false, customer listing badge: false

- **PASS** Tech Domain API subStatus is CHECK_IN
- **PASS** status is INPROGRESS
- **PASS** customer listing shows the work order

CHECK_OUT · Tech Domain API INPROGRESS/CHECK_OUT · customer API INPROGRESS/null (customerStatus -) · 2/2 passed

Customer listing row (tab INPROGRESS): -
Customer detail header:
Info: technician sub-status CHECK_OUT - customer API exposes it: false, customer listing badge: false

- **PASS** Tech Domain API subStatus is CHECK_OUT
- **PASS** customer listing shows the work order

WORKDONE · Tech Domain API WORKDONE/- · customer API WORKDONE/null (customerStatus -) · 2/2 passed

Customer listing row (tab WORKDONE): -
Customer detail header:

- **PASS** status is WORKDONE
- **PASS** customer listing shows the work order

REVIEWED · Tech Domain API WORKDONE/REVIEWED · customer API WORKDONE/null (customerStatus -) · 6/6 passed

Customer listing row (tab WORKDONE): 10959 Customer Company 10090955 DC Project Work Done TD123 S1 1009112549 by Customer owner Syed Hamza 10/09/2026 at 12:53 PM (CUT) Lahore, Pakistan, Pakistan
Customer detail header:

- **PASS** Tech Domain API subStatus is REVIEWED
- **PASS** customer listing shows the work order
- **PASS** customer API does NOT expose REVIEWED as customerSubStatus
- **PASS** customer listing row does NOT show "Reviewed"
- **PASS** customer detail page does NOT show "Reviewed"
- **PASS** Tech Domain detail page still shows "Reviewed"

VERIFIED · Tech Domain API VERIFIED/PO_PENDING · customer API VERIFIED/PO_PENDING (customerStatus -) · 5/5 passed

Customer listing row (tab WORKDONE): 10959 Customer Company 10090955 DC Project Work Done PO Pending TD123 S1 1009112549 by Customer owner Syed Hamza 10/09/2026 at 12:53 PM (CUT) Lahore, Pakistan, Pakistan
Customer detail header:

- **PASS** status is VERIFIED
- **PASS** customer listing shows the work order
- **PASS** customer API exposes PO_PENDING (customerSubStatus or subStatus)
- **PASS** customer listing row shows "PO Pending"
- **PASS** customer detail page shows "PO Pending"

PO_PENDING · Tech Domain API VERIFIED/PO_PENDING · customer API VERIFIED/PO_PENDING (customerStatus -) · 5/5 passed

Customer listing row (tab WORKDONE): 10959 Customer Company 10090955 DC Project Work Done PO Pending TD123 S1 1009112549 by Customer owner Syed Hamza 10/09/2026 at 12:53 PM (CUT) Lahore, Pakistan, Pakistan
Customer detail header:

- **PASS** Tech Domain API subStatus is PO_PENDING
- **PASS** customer listing shows the work order
- **PASS** customer API exposes PO_PENDING (customerSubStatus or subStatus)
- **PASS** customer listing row shows "PO Pending"
- **PASS** customer detail page shows "PO Pending"

APPROVED · Tech Domain API APPROVED/PO_PENDING · customer API APPROVED/PO_PENDING (customerStatus APPROVED) · 5/5 passed

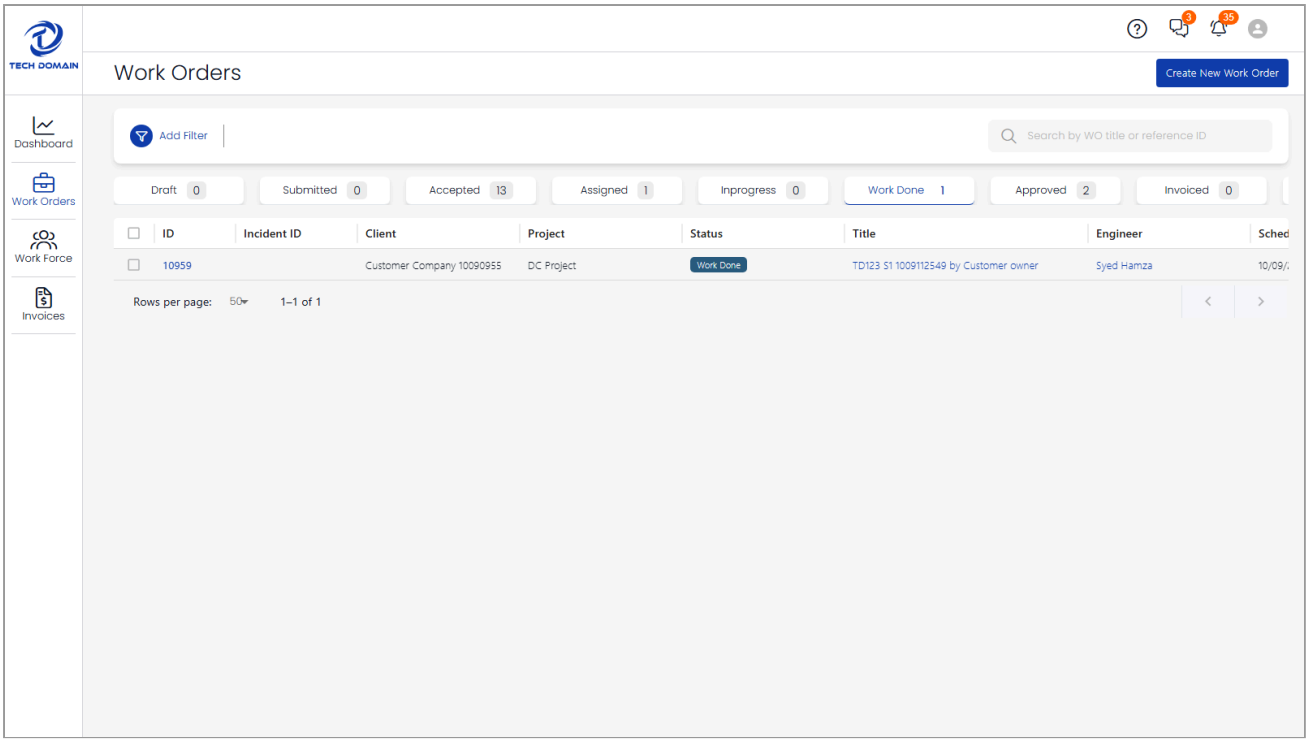

Customer listing row (tab APPROVED): 10959 Customer Company 10090955 DC Project Approved PO Pending TD123 S1 1009112549 by Customer owner Syed Hamza 10/09/2026 at 12:53 PM (CUT) Lahore, Pakistan, Pakistan
Customer detail header: Dashboard Work Orders Work Force Invoices 3 36 Approved PO Pending #10959 On 10/09/2026 TD123 S1 1009112549 by Customer owner Working Hours 0 hours 1 min Paymen

- **PASS** status is APPROVED
- **PASS** customer listing shows the work order
- **PASS** customer API exposes PO_PENDING (customerSubStatus or subStatus)
- **PASS** customer listing row shows "PO Pending"
- **PASS** customer detail page shows "PO Pending"

4. Evidence screenshots

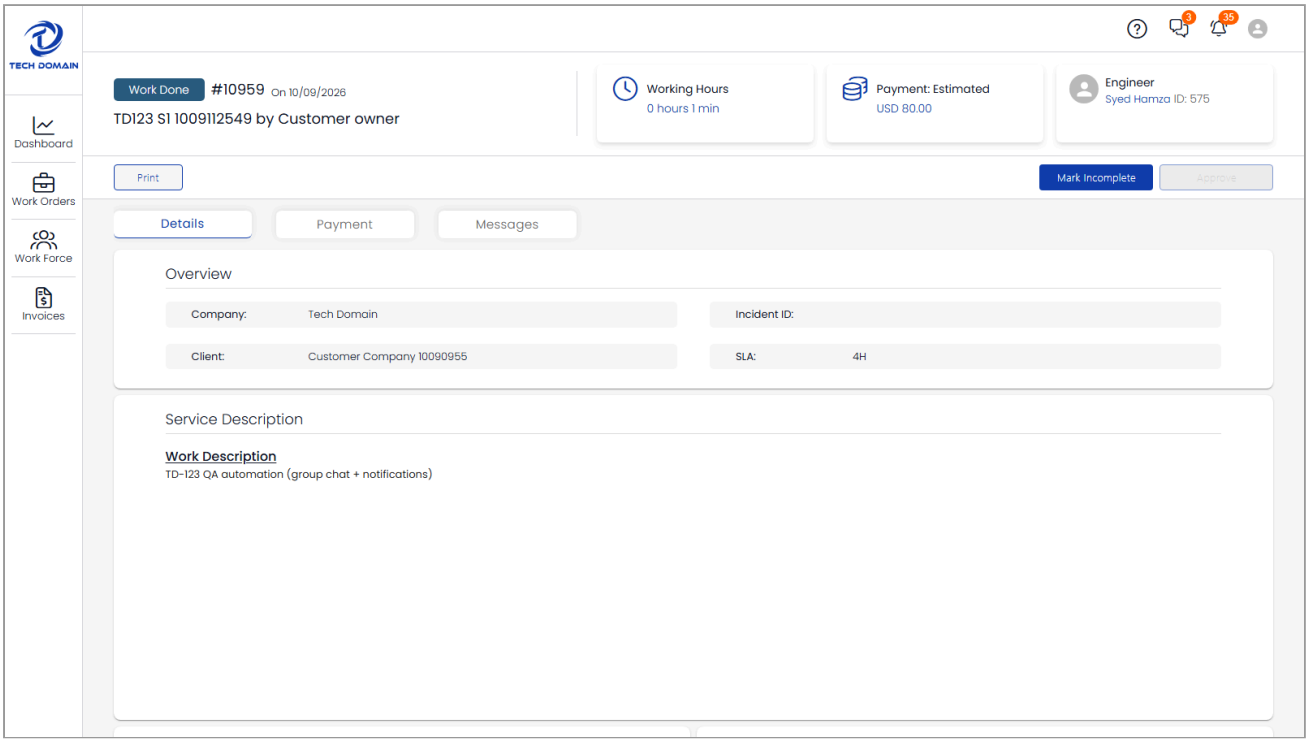

REVIEWED - customer listing: status "Work Done" without "Reviewed"

5. Findings

- No defect against the ticket requirement. Open question for the developer: technician sub-statuses are also hidden from the customer (see section 1).
